PRAVEEN KUMAR REDDY

AI Engineer | Generative AI & Agentic AI Systems
bissaiahgaripraveenreddy.dev@gmail.com | +91 8792793431 | Bengaluru, India | github.com/Praveenkumarreddy12

SUMMARY

AI Engineer with 2 years of experience building production multi-agent and Graph-RAG systems using Python, LangGraph, OpenAI, and MCP. Skilled at designing FastAPI microservices on Kafka, Redis, and PostgreSQL, deployed on Kubernetes. Built an incident-investigation platform that cut investigation time from ~45 minutes to under 8.

TECHNICAL SKILLS

- **GenAI & Agentic AI:** LangGraph, LangChain, CrewAI, OpenAI API, Groq API, MCP, A2A Protocol, Multi-Agent Systems, Prompt Engineering, Tool/Function Calling
- **RAG & Search:** RAG, Graph-RAG, Neo4j, Elasticsearch, ChromaDB, HuggingFace Embeddings, Semantic Search, Text Chunking
- **Backend & Data:** Python, FastAPI, Kafka, Redis, PostgreSQL, REST APIs, Microservices
- **Deployment & MLOps:** Docker, Kubernetes, MLflow, Prometheus, Git
- **Other:** Streamlit

EXPERIENCE

AI/ML Engineer, Generative AI & Agentic AI | Axisweb Soft Technology, Bengaluru | Oct 2024 – Sep 2026

- Built a multi-agent incident-investigation platform with LangGraph, OpenAI GPT-4.1, MCP, and A2A, where specialized agents analyze logs, metrics, deployments, and infrastructure events.
- Developed Graph-RAG pipelines on Neo4j and Elasticsearch, correlating logs, Kubernetes events, deployment history, and past incidents for evidence-based root-cause identification.
- Engineered LLM-based evidence ranking that outputs probable root causes, confidence scores, and remediation steps with supporting evidence.
- Designed FastAPI microservices using Kafka, Redis, and PostgreSQL for real-time incident ingestion and asynchronous AI workflow orchestration.
- Deployed services with Docker and Kubernetes; used Prometheus for monitoring and MLflow for evaluation and prompt versioning, **reducing investigation time from ~45 min to under 8 min**.

PROJECTS

RAG-Based AI Career Coach | Python, LangChain, ChatGroq, HuggingFace Embeddings, ChromaDB, Streamlit

- Built a RAG app that indexes a resume and JD to generate ATS-style reports, skill-gap analysis, and interview questions.
- Implemented PDF/DOCX/TXT ingestion, recursive chunking, and top-k (k=6) ChromaDB retrieval to ground LLM answers in source context.

Multi-Agent Trip Planner | Python, LangGraph, CrewAI, Groq API, Streamlit, Docker

- Built a CrewAI team (Researcher, Analyst, Itinerary Writer) that plans trips from live web data, with agents cross-checking each other's outputs.
- Implemented stateful LangGraph workflows with tool calling that let agents backtrack and re-plan; containerized with Docker.

EDUCATION

B.Tech, Computer Science and Engineering | Siddharth Institute of Engineering and Technology | 2020 – 2024 | CGPA: 8.33/10

CERTIFICATIONS (include only if verified as yours)

- Google Cloud Professional Machine Learning Engineer (2024)
- IBM Machine Learning Professional Certificate (2023)
- AI Agents Course, Hugging Face (2026)
